- Scrap Memory & Processors

Outright Purchasing of E-Scrap

At Colt Recycling we offer a straightforward and accountable service to E-Scrap generators. **We outright purchase and process millions of pounds annually of sorted E-Scrap commodities generated by recyclers, brokers and de-manufacturing facilities nationwide.**

Colt Recycling has a complete understanding of E-Scrap commodity values and related markets. Combining this with high volume processing, shredding capacity, and sophisticated separation, enables us to be competitive in our pricing and still offer **domestic processing, downstream accountability and certified destruction.**

Precious metal bearing materials such as circuit boards, backplanes, memory modules and processors are also purchased outright at very competitive prices. Our buyers have decades of experience in the E-Scrap and PM refining fields and will assist the customer in identifying and categorizing their material, according to commodity type and value.

- Domestic Processing into raw materials
- Certified Destruction via shredding
- Competitive Commodity Pricing

An environmentally correct, secure, and economical solution for the customer!
